

Undress for The Met

Modern and Contemporary Art

30 years since the inception of The Guerrilla Girls infamous poster "Do Women Have To Be Naked To Get Into The Met Museum", I began to question how as The Metropolitan Museum of Art progressed? Are there more female nudes on display, compared to artworks by female artists?

As this issue has become addressed by The Metropolitan Museum of Art's curatorial staff, this infographic explores the Modern and Contemporary art currently on display. Black represents artworks containing female nudes, while pink represents artworks by female artists. The size of the typography is reflective of the acquisition date.
